

# Consultant Statistician

## Overview:

Veramed is a specialist contract research organisation (CRO) to the pharmaceutical industry, focused on delivering high quality statistics and programming for the reporting of Phase I-IV clinical trials across a variety of therapeutic areas. The projects and clients we work with provide a varied and exciting challenge; this in turn enables us to help develop and enhance our employees' capabilities and gives opportunities for growth.

**Location:** Twickenham, London / Alderley Edge, Manchester / Swansea, Wales / Home based

## Purpose:

The role of the Consultant Statistician is to provide statistical support to the statistics and programming department across a range of projects, clients and therapeutic areas.

## Key Responsibilities:

The job tasks listed below outline the scope of the position. The application of these tasks may vary, based on current business needs.

### Technical

- Perform technical review and provide input into clinical trial documents including protocols, CRFs, CSRs
- Author and review study SAP, TFL shells and dataset specifications
- Support study and/or compound level activities advising on study design and statistical issues across phases and therapeutic areas
- Author, validate and document SAS programs for datasets, TFLs and macros, applying good programming practice
- Application of complex statistical techniques (e.g. mixed effects, non-linear modelling, Bayesian, advanced survival), model checking and interpretation
- Identify and implement appropriate sample size method using software or simulations
- Identify data and standards issues and resolve or escalate as appropriate
- Awareness of emerging standards and associated impact to ongoing and future planned trials
- Maintain proficiency in statistical methodology
- Maintain study master file documents and any other documents that are required to be audit ready

### Project Management

- Oversight of key client projects/portfolios, including:
  - Being Lead Statistician on client accounts and projects (where necessary)
  - Managing client expectations and issue resolution
- Input into and review of project management documents

### General

- Contribute to internal and client study team meetings
- Perform work in full compliance with applicable internal and client policies, procedures, processes and training

### Minimum Qualification Requirements:

- BSc, MSc or PhD in numerical discipline (or relevant equivalent industry experience)
- At least 6 years of relevant industry experience

### Additional Requirements:

- Awareness of industry and project standards & ICH guidelines
- Excellent verbal and written communication skills
- Interpersonal/teamwork skills for effective interactions
- Proficiency in data handling using SAS or other statistical software (e.g. R)
- Self-management skills with a focus on results for timely and accurate completion of competing deliverables
- Ability to work independently and as part of a team
